GIB CONTROLLING

OPTIMIZE INVENTORY QUICKLY AND EASILY WITH GIB CONTROLLING

CONTROL PROCESSES INTELLIGENTLY AND OPTIMIZE KPIS

GIB Controlling helps you optimize your stock for the long term – while expending the minimum amount of time. Industry-specific rule-based systems may be based on however many dimensions you prefer, such as delivery groups, product lifecycles like LRODI, intrinsic value (ABC), consistency (XYZ), and much more. These sets of rules can be implemented as pre-defined industry content in GIB Controlling. Preconfiguration shortens the time to market and results in an increased degree of effectiveness.

With the GIB Controlling Dashboard, stock and scheduling and parts controlling can be carried out in a single, central application. By specifying certain measured quantities such as capital turnover and range, when you apply an automated set of rules, you get the optimal recommendation for the planning parameters.

The result: Optimize your inventories while at the same time increasing your supply readiness. This lets you easily establish goal-oriented navigation with your inventory key indicators and creates decision-relevant transparency.

Thanks to the simulation mode, you can simulate the defined rule-based systems and their impact on stock and supply readiness. This simulation can be calculated on the individual material level as well as on the level of free aggregation and/or an entire facility. Simulation mode is “learning technique” with which the interaction of different planning characteristics, lot-sizing procedures (Andler, Groff, etc.) and configured certainties can be forecast with precision. This facilitates certainty and acceptance in the use of the GIB Suite.

TAKE YOUR SUPPLY CHAIN TO THE NEXT LEVEL

INVENTORY REDUCTION WITH GIB CONTROLLING

YOU KNOW A GIB CONTROLLING USER, TOO

...AND WHEN WILL YOU OPTIMIZE?

WE ARE A STRONG PARTNER FOR YOUR SUPPLY CHAIN

As a software provider and licensed SAP Silver Partner, we've made it our mission to improve logistic processes in SAP. By working with GIB, you'll optimize your supply chain and expand the SAP standard to include important resource-planning functions and techniques, and thus gain a decisive advantage on your path to success. Reduce unnecessary warehouse stock, increase your supply readiness, and become noticeably more efficient!

In GIB, you have an experienced and competent partner by your side, one that will accompany you throughout the entire process – before, during, and after implementation. Our success is defined by our 26 years of experience and over 600 satisfied customers in more than 20 countries around the world. Become a part of this, too, and join GIB as we head for SUCCESS.
